Metal Coats

Metal Coats a unit of Kumbhat Group is situated at 179, SIDCO Industrial Estate, Ambattur, Chennai - 600 098.

Metal Coats manufactures a range of steel tubular poles starting from ornamental poles for garden lighting, swaged tubular poles for street lighting, surface mounting poles, semi high masts and high masts. Even though the unit was started in nineties, it has grown in leaps and bounds to establish itself as the trend setter in the steel tubular poles for lighting, mainly because of the expertise of our group companies in the lighting arena and the encouragement of our valued customers. The poles from **Metal Coats** have been the first choice for many discerning engineers / consultants and the clientele list is a standing proof. **Metal Coats** operates with a quality management systems conforming to ISO 9001 : 2001

The export of tubular and ornamental poles to Sri Lanka, Russia, Nepal and Maldives speak for themselves the standards maintained. **Metal Coats** is fully equipped with in-house fabrication. To ensure quality and enhance the confidence level of our buyers, new testing facilities are being introduced and testing and advisory tie-up is planned with leading laboratories and technical institutions.

Metal Coats also manufacture poles of integrated design with the required base plates, foundation bolts, control gear with enclosure, earth boss etc., and prewired. The poles undergo special surface treatment and are finished with paints (including vapour curing) and colour as per the customer choice. The ease of installation and maintenance are the hallmarks of our instant success in the surface mounting poles. The intermediary range of poles are specially designed to meet the requirements of assembly area, railway yards, port trust, refineries etc., **Metal Coats** have now specialised in polygonal posts of tapering construction for low, medium and highmasts with the gearing up of the existing facilities and installation of a 200 tonne swaging machine the company is committed to produce higher sizes of poles to International Standards.

Metal Coats also offers integrated lighting solutions for Area lighting, Street lighting, Garden lighting, etc., **Metal Coats** swaged tubular poles with metal halide lamp flood lights on specially designed brackets is an exclusive solution for lighting of Sports arena like Tennis Courts, Basket Ball Courts, Volley Ball Courts, Swimming pools and similar application area. **Metal Coats** offers solution for every lighting need by it technical design and application wing.
